Project No. 3049001-108  
Report No. 3049001-001

Subject: Ozone off-gas test of your Ionic Air Purifier, Model AS150MM

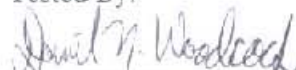

Dear Mr. Weinberg;

We have completed our testing of the above referenced equipment and this letter will serve as our report. The unit was tested in accordance with the section 32.1 of the standard for Safety of Household and Similar Electrical Appliances Part 2-65: Particular Requirements for Air-Cleaning Appliances (IEC 60335-2-65, 1<sup>st</sup> ed. 06/01/93). Per your instruction and the requirements of the standard, the unit was tested in the center of the room. The ambient room ozone was measured at 0.023 ppm and after 24 hours of continuous operation, the ozone measured was 0.055 ppm. Per the requirements of the standard, the ambient measured ozone is to be subtracted from the largest measurement during the 24 hours. The unit tested generated a maximum of 0.032 ppm.

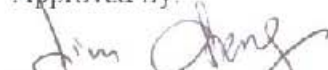

We are happy to inform you that the equipment does comply with the requirements of section 32.1, which requires that it shall not exceed the limit of 0.05 ppm.

This letter completes the evaluation phase of the original work anticipated by our Project No. 3049001-108. Please review our comments and send a letter describing the method of correcting each item listed above to our office. In order for our office to complete your Project, a copy of this letter, along with the aforementioned letter and any other information that would be pertinent, should be provided. All correspondence should be addressed to Sherry Tello, Customer Operations Specialist. If there are any other questions or issues, please feel free to contact this office.
